

# CARE & CLEANING GUIDE

## for ENDURATEX™ Coated Fabrics

### STEP 1:

- In general, most spills can be easily removed using a mixture of 10% household soap and 90% warm water.
- Apply the mixture with a clean, soft and dampened cloth.
- Rub gently, then rinse with a clean, soft and dampened cloth with water and let dry.

### STEP 2:

- For more stubborn stains or for heavy soiling, use a soft clean cloth with a 50/50 solution of Formula 409® or Fantastik® and water.
- Gently rub the affected area with a soft clean cloth and rinse with water.

### STEP 3:

- For difficult stains, use a clean, soft and dampened cloth with a mixture of 1 part household bleach to 10 parts of water.
- Rub the affected area gently and rinse with a clean, soft and dampened cloth with water to remove bleach concentrate.

Information in our care guides is based on Enduratex™ product performance when subjected to specific tests conducted in laboratory conditions. Results may vary under actual conditions. This guide does not constitute a guarantee and users are not relieved from the responsibility of practicing proper product use, care, cleaning and or disinfecting. Cleaning and disinfecting agents contain substances that can harm the appearance and longevity of vinyl products. Enduratex™ is not responsible for product damage resulting from the failure to follow the recommended use, care, cleaning and disinfecting guidelines.
